

Engine motor mount for the Lycoming 320-360 with Dyna Focal 1 .

Perfect jig welded!

Patrol - engine motor mount available!

Other custom engineered mounts also available.

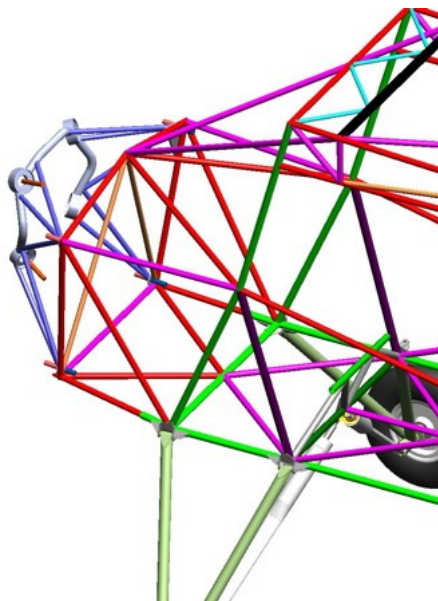

- Jigged on heavy plate stock fire wall bolt alignment.
- Cad drawn for proper angle alignment
- Many stages available—see options

- Please note I have added bushing washers for fire wall side for more strength less stress to fire wall plate
- All side to side angles maintained.
- Motor tilt angle kept into account.
- Front to aft distance within call out range.

See page 2

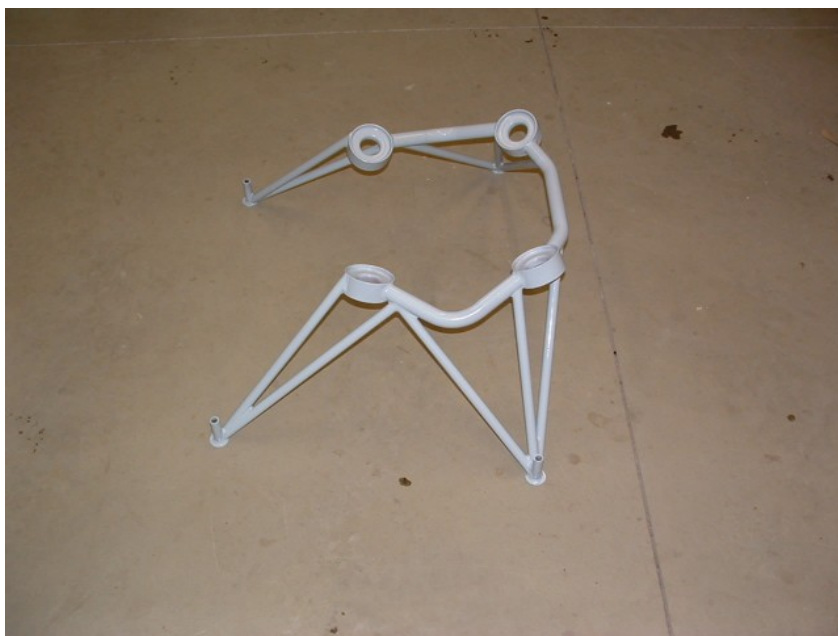

Engine motor mount for the Lycoming 320-360 with Dyna Focal 1 .

Cad drawn for calculated bolt clearance. Proper distance and angles held in place. (see orange bolts to the left)

Welded in fixtures to ensure straight motor alignment.

Shown here in Dawn Patrol Grey, a very neutral grey, a few shades off of stone white. A color that would show cracks (rusting) quickly if they every show up years down the road even before any annual inspection. Can also be shipped bare or with stock Super Rustoleum Primer— your choice.

Price options:

- 10 mount tubes CAD drawn and profiled with bushings and washers—\$259 plus shipping
 - Fully welded to dyna ring and primed. — — — — \$650
 - Fully welded and painted, either Dawn grey as shown or black satin— \$690
 - Please add shipping cost to above prices.
